

CANCER IN SOUTH AFRICA
2003
FULL REPORT
NATIONAL CANCER REGISTRY

Summary of Incidence of Histologically Diagnosed Cancer in South Africa, 2003

The National Cancer Registry collects information on cases with histologically diagnosed cancer via a country-wide network of some private and all public pathology laboratories. This is a summary of cancer incidence in South Africa for 2003 to assist in the planning and evaluation of cancer control programmes. In 2003 a total of 55,528 new cancer cases were registered.

For reporting purposes some cancers such as skin, including basal cell carcinoma (BCC), squamous cell carcinoma (SCC), and other skin cancers have been combined into one category. These are cancers which are in situ and very rarely develop into malignant cancers. However, due to high exposure to sun and UV radiation in this country these cancers are very common. Melanoma is not included in this combined category as it is a very rapidly growing malignancy.

When ranked by age standardised incidence rates (ASIR) the top five cancers in males are BCC/SCC/other skin, prostate, primary site unknown, lung, and colorectal. The top five cancers in females are BCC/SCC/other skin, breast, cervix, primary site unknown, and colorectal. The top five cancers in children are leukaemia, brain and central nervous system, kidney, connective tissue, and non-Hodgkin lymphoma.

Pathology based registries underestimate the burden of cancer. This is because some cancers are diagnosed without laboratory confirmation and for this reason these data provide the lowest estimate of the country's cancer burden. Comparisons between population groups and internationally much therefore be made with extreme caution. Despite the limitations of a pathology-based registry, the NCR is the only source of information on cancer incidence for South Africa. As with previous NCR reports, these data show that a number of cancers, especially oesophagus, cervix, skin, and lung, are important public health problems in South Africa.

NOTES:

- N(OBS) Number of new cases with sex known
- N(ADJ) Number of new cases adjusted for those with sex unknown
- % Percentage of all cancers (after adjustment)
- CRUDE Adjusted cases per 100 000/year
- ASR Age standardised incidence rate per 100 000 (World Standard Population)
The ASR calculation incorporates an adjustment for the proportion of cases with age unknown
- 95% L/UCL Lower/Upper 95% confidence interval for the ASR
- CUMRISK 0-74 Cumulative lifetime incidence risk (0-74 years)
- LR 0-74 Lifetime (0-74) risk of developing a cancer expressed as 1 in X number of people
- *TOTALS The rates calculated for the total exclude BCC and SCC of the skin

NOTES:

N(OBS) Number of new cases with sex known
N(ADJ) Number of new cases adjusted for those with sex unknown
% Percentage of all cancers (after adjustment)
CRUDE Adjusted cases per 100 000/year
ASR Age standardised incidence rate per 100 000 (World Standard Population)
The ASR calculation incorporates an adjustment for the proportion of cases with age unknown
95% L/UCL Lower/Upper 95% confidence interval for the ASR
CUMRISK 0-74 Cumulative lifetime incidence risk (0-74 years)
LR 0-74 Lifetime (0-74) risk of developing a cancer expressed as 1 in X number of people
*TOTALS The rates calculated for the total exclude BCC and SCC of the skin
