Background

The South African Field Epidemiology Training Programme (SAFETP) is now accepting applications for the 2021 class, from qualified health professionals with interest in public health and commitment to public service.

SAFETP is hosted by the National Institute for Communicable Diseases (NICD) of the National Health Laboratory Services (NHLS), for the National Department of Health (NDoH). The programme is a combination of didactic and practical training in which the resident is grounded in the academic basics of applied epidemiology and is assigned to field sites where s/he learns by doing while being mentored by experienced supervisors to projects that address critical public health priorities.

This residency programme is a two-year, full-time training, from which residents graduate with a Master of Science (MSc) in Field Epidemiology from either the University of Pretoria or the University of the Witwatersrand. The 2021 cohort will begin in January 2021 and end in December 2022. Applicants are required to apply at both the University of Pretoria and the University of the Witwatersrand.

The growing field of public health and epidemiology in South Africa and globally brings exciting opportunities for graduates and professionals from health-related fields to become competent in applied epidemiology of diseases and conditions relevant to South Africa. It also develops their leadership and management skills relevant to public health system strengthening and management. The training focuses on investigations of public health outbreaks (an acute health event or other epidemiological activity) and using epidemiology and biostatistics to conduct descriptive and analytical studies.

Bursaries/scholarships may be available for select South African applicants fulfilling predefined criteria. South African applicants working currently within the South African government at various levels, who plan to take study leave to participate in the programme and afterwards return to their workplace, must have written approval from their departments for the entire two years. NICD staff that have been funded and granted study leave will be required to continue working for the NICD for at least two (2) years after completing the MSc programme.

South Africans and permanent residents who are funded by their employers must ensure that this funding covers their salaries/stipends, as well as university registration and tuition fees for the two-year training period.

For applicants applying from other African countries - the eligibility requirements still apply, and the international applicant must have the required visa and permissions to study in South Africa. The applicants must ensure that all the costs related to participation in SAFETP are fully covered for the 2 years of training - including salaries/stipends, university registration and tuition fees, accommodation, travel and accommodation to investigate outbreaks by their respective governments

*Join the growing field of public health and epidemiology in
South Africa and respond to health threats*

Application Requirements

Work experience requirements

- * Professional experience in a health field or other fields relevant to health
- * Experience of working in the public health system is desirable

Educational requirements

- * Medical, veterinary or dentistry degree ; OR
- * Doctorate degree in a medical/health related field; OR
- * Master's degree in a medical or health related field; OR
- * Honour's/bachelor's degree with prior research experience

Other key requirements:

In addition to the above requirements, the applicant must:

- * Be registered with their respective professional bodies
- * Be fluent in spoken and written English
- * Be computer literate and proficient in Microsoft Word, Excel, Power Point and Outlook for use in communication, word processing, analysis, presentation and report generation. Knowledge of a statistical package will be an advantage
- * Have a valid driver's license and be willing to drive a hired car
- * Provide proof of current physical residential address for future purposes of Domicilium citandi et executandi.

Please note the following regarding educational requirements:

- * All degrees should be in a health, laboratory or public health related field from an accredited university
- * A Bachelor of Technology (B-Tech) degree does not fulfill the minimum educational requirements of the University of Pretoria, the University of the Witwatersrand and the SAFETP.

How to apply

Applying to SAFETP

If you meet the requirements you can complete an online application form using this link: [Application Form](#)

You will need the following documents to complete the online application process:

1. Certified copies of qualification certificates
2. Certified copies of transcripts from the universities
3. A concise two-page CV
4. Statement of Purpose: In 500 words or less describe your career goals and your interest in applying for SAFETP residency
5. Two completed reference forms. You can download the template form on this link: [Reference Form](#)
6. Proof of application to the universities
7. Applicants whose qualifications were obtained outside South Africa must have their original degrees accredited by the South African Qualifications Authority ([SAQA](#)).
8. Non-South Africans from non-English speaking countries are expected to pass the Test of English as Foreign Language ([TOEFL](#)) when accepted onto the programme

Applying to the University

In addition to completing the online application to SAFETP, you should also complete applications to BOTH, the University of Pretoria and the University of Witwatersrand, as follows:

University of Pretoria:

<http://www.up.ac.za/en/online-application/article/2445192/apply-at-the-university-of-pretoria>

University of the Witwatersrand:

<http://www.wits.ac.za/postgraduate/applications/>

Also visit the following page for the discipline-specific requirements: <http://www.wits.ac.za/publichealth/academic-programmes/postgraduate/master-of-science-in-epidemiology/>

Select to apply to study Field Epidemiology in the MSc Epidemiology Programme of the University of the Witwatersrand.

Submit your proof of application:

Copies of the e-mail confirmation that you receive when you submit your application to the University of Pretoria AND the University of the Witwatersrand should accompany the documents that you submit with your online application to SAFETP.

- * *It is your responsibility to ensure that you submit the completed online application; incomplete applications or those submitted after the closing date will not be considered.*
- * *Selection into the program will be primarily based on the applicant's performance on the completed application, in-person interview, and test on the day of the interview.*
- * *Correspondence will be made with shortlisted candidates only. If you have not heard from SAFETP within 6 weeks of the final dosing date, please consider your application to be unsuccessful. For further information, please visit the website: <https://www.nicd.ac.za/training/south-african-field-epidemiology-training-programme/>*
