

COVID-19 WEEKLY PROVINCIAL EPIDEMIOLOGY BRIEF

NATIONAL INSTITUTE FOR
COMMUNICABLE DISEASES

Division of the National Health Laboratory Service

SOUTH AFRICA WEEK 47 2020

CUMULATIVE DATA FROM

Methods

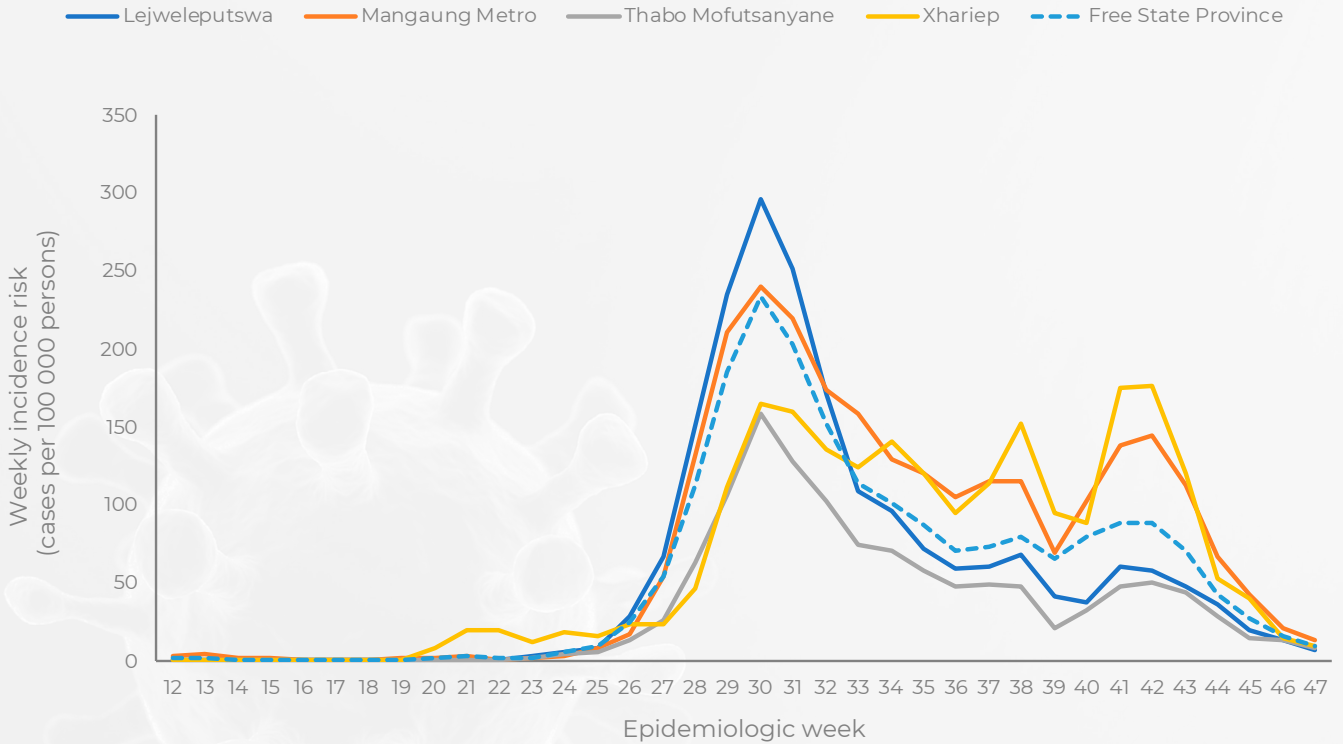

Additional methods for this report can be found in the Weekly Epidemiologic Brief ([Link](#)). Data on province and district allocation was based on geocoding algorithm using in order of priority (i) completeness of patient data, (ii) submitting doctor's address, (iii) registering doctor's address and as final option, (iv) the guarantor's address data. The geocoding algorithm used the most complete data for assigning data on province and district where adequate information was provided on the lab request form at the time of sample collection. Data on district allocation may lag resulting in number of cases in recent weeks missing district allocation. Prevalence and incidence risk by districts should be interpreted with caution.

District trends of COVID-19 cases

Summary and graphs describing the trends by district and age group for Eastern Cape Province and Western Cape Province, can be accessed in the **Weekly Epidemiology Brief** published simultaneously with this report.

Free State Province

A

B

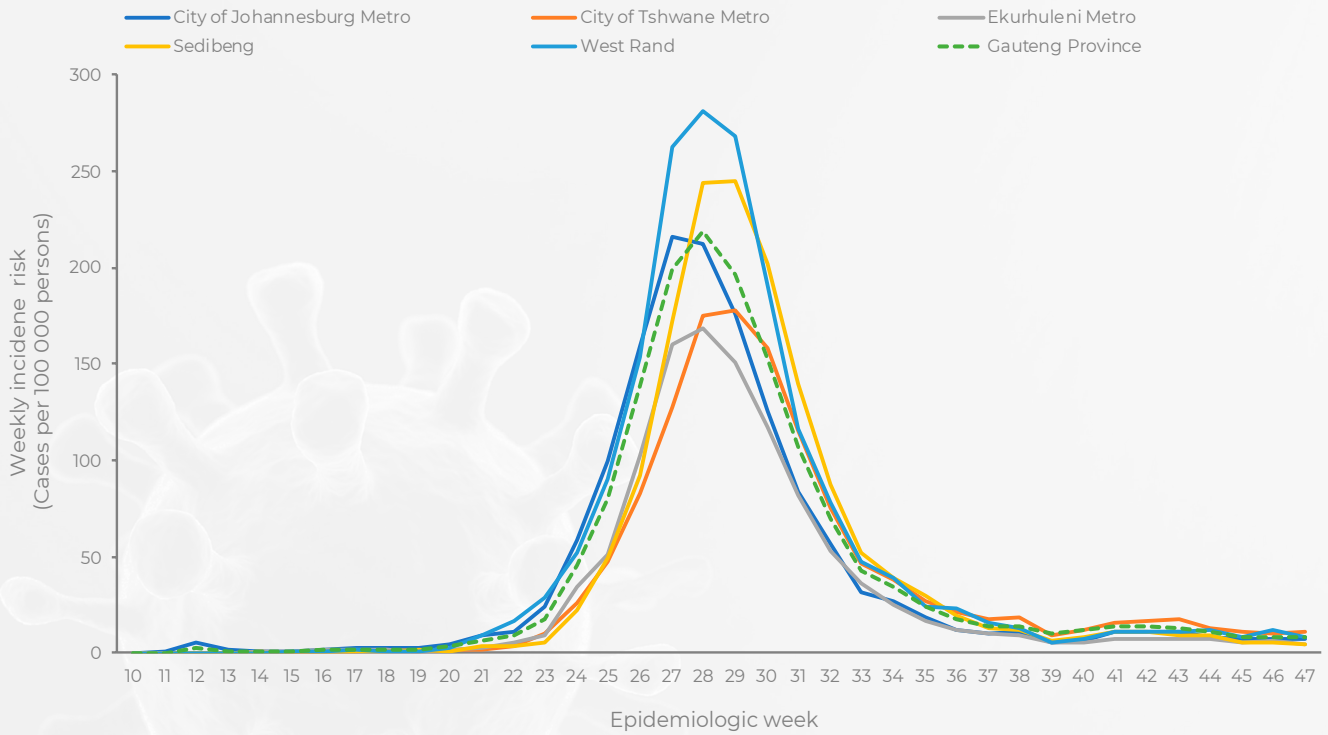

Figure 1. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, Free State Province, 3 March-21 November 2020 (a) by district (n= 53 792, 4 974 missing district) (b) by age group in years (n= 58 607, 159 missing age)

Gauteng Province

A

B

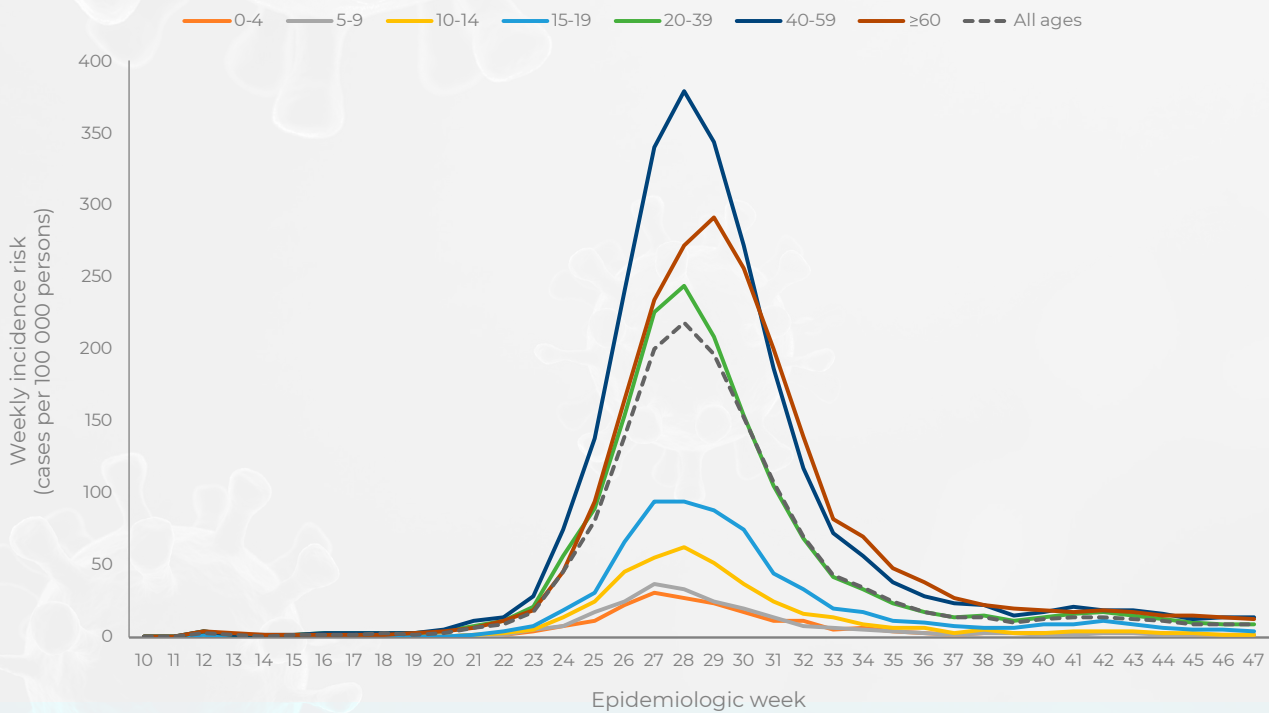

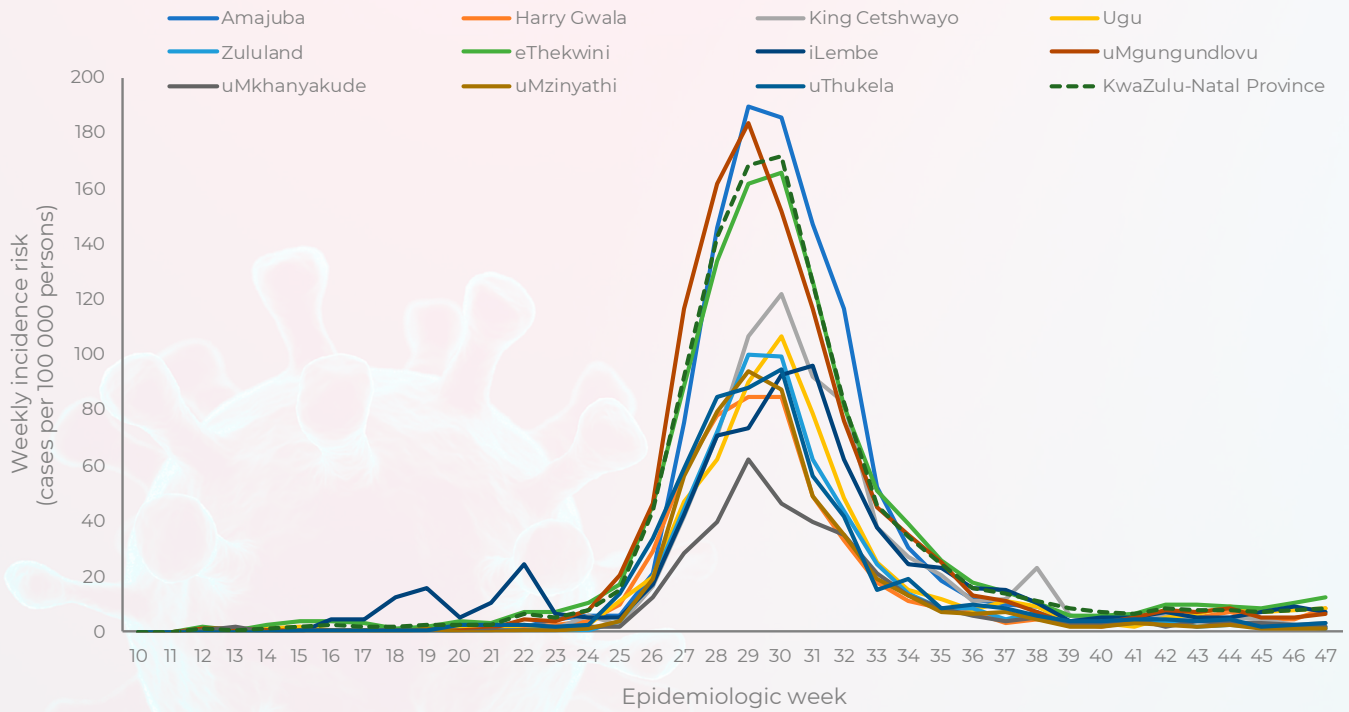

Figure 2. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, Gauteng Province, 3 March-21 November 2020 (a) by district (n= 208 941, 24 095 missing district) (b) by age group in years (n= 230 629, 2 407 missing age)

KwaZulu-Natal Province

A

B

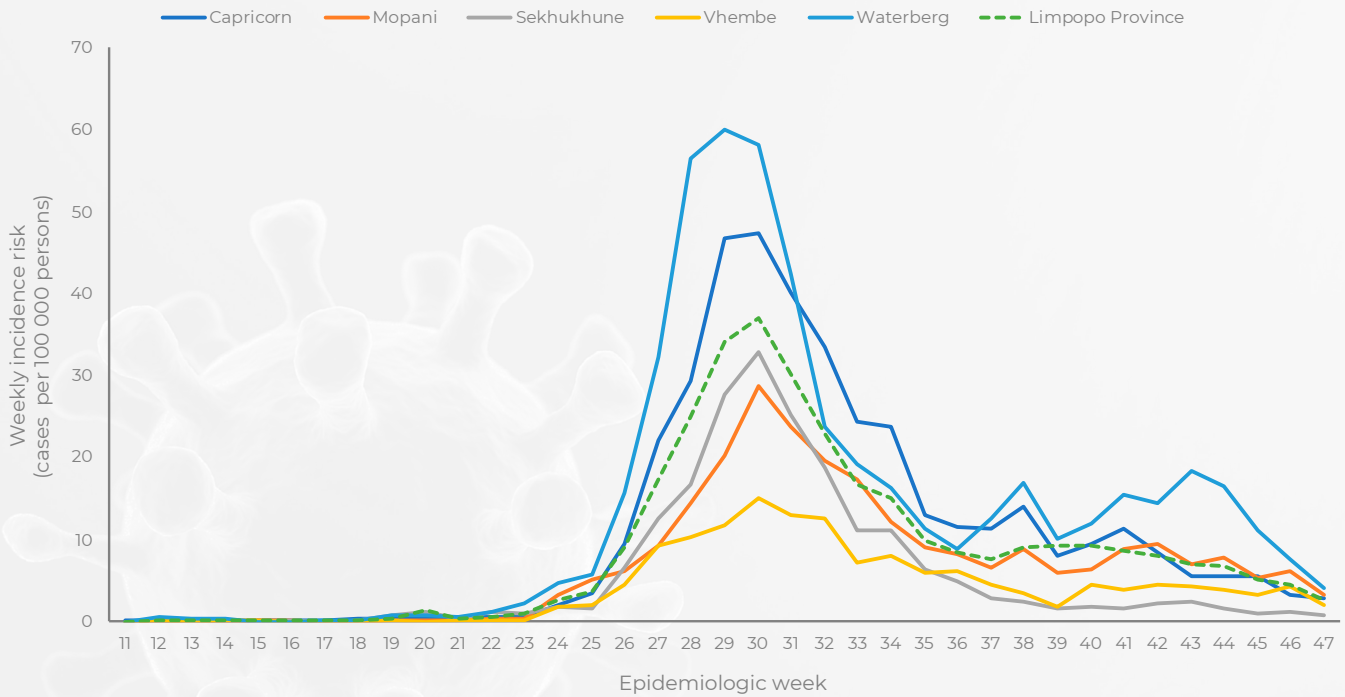

Figure 3. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, KwaZulu-Natal Province, 3 March-21 November 2020 (a) by district (n= 96 522, 29 512 missing district) (b) by age group in years (n= 125 059, 975 missing age)

Limpopo Province

A

B

Figure 4. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, Limpopo Province, 3 March-21 November 2020 (a) by district (n= 16 429, 1 970 missing district) (b) by age group in years (n= 18 331, 68 missing age)

Mpumalanga Province

A

B

Figure 5. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, Mpumalanga Province, 3 March-21 November 2020 (a) by district (n= 28 080, 2 992 missing district) (b) by age group in years (n= 30 717, 355 missing age)

North West Province

A

B

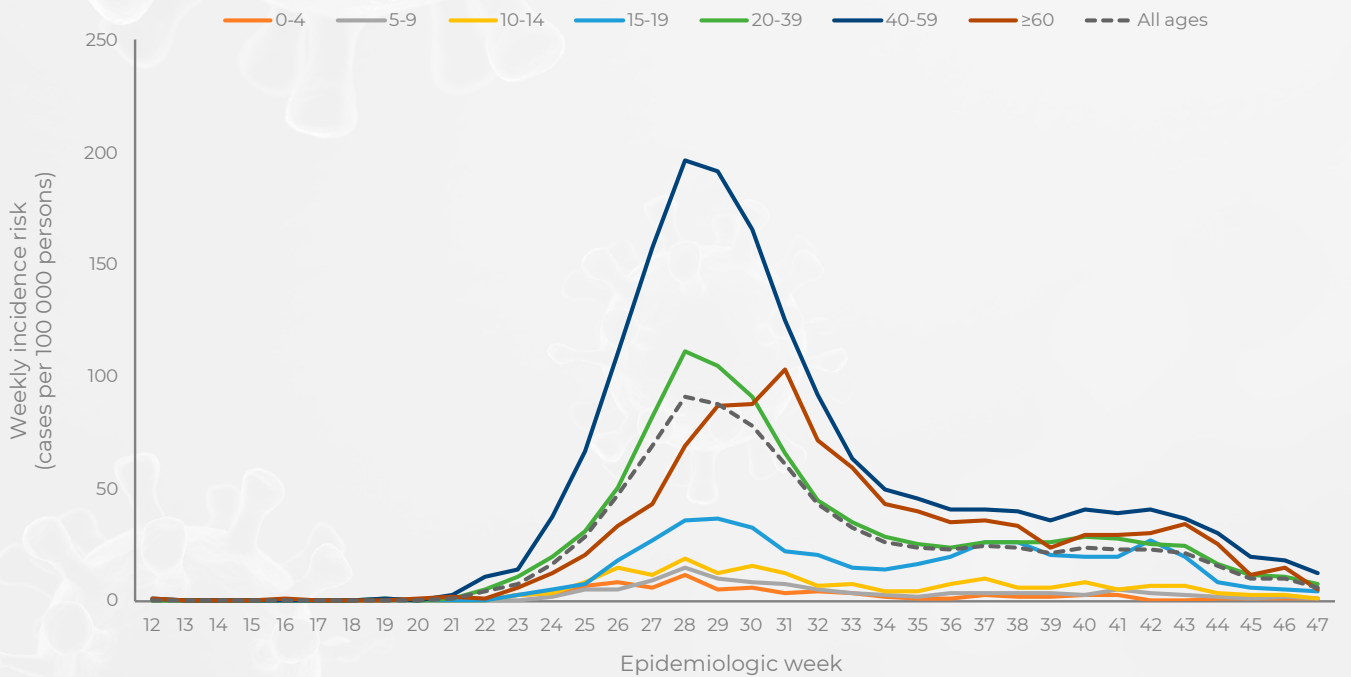

Figure 6. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, North West Province, 3 March–21 November 2020 (a) by district (n= 29 351, 5 246 missing district) (b) by age group in years (n= 34 303, 294 missing age)

Northern Cape Province

A

B

Figure 7. Weekly incidence risk of PCR-confirmed cases of COVID-19 by epidemiologic week, Northern Cape Province, 3 March-21 November 2020 (a) by district (n= 19 245, 3 707 missing district) (b) by age group in years (n= 22 734, 218 missing age)
