NATIONAL INSTITUTE FOR  
COMMUNICABLE DISEASES

Division of the National Health Laboratory Service

SOUTH AFRICA WEEK 24 2021

## OVERVIEW

This report summarises data of COVID-19 cases admitted to DATCOV hospital surveillance sites in all provinces. The report is based on data collected from 5 March 2020 to 19 June 2021.

## HIGHLIGHTS

- As of 19 June 2021, 291,476 COVID-19 admissions and 58,804 in-hospital deaths were reported from 656 facilities (399 public-sector and 257 private-sector) in all nine provinces of South Africa.
- Increases in admissions in Gauteng, Northern Cape, North West, Free State and Western Cape provinces have been observed and these provinces have reached the case threshold for the third wave. Increased admissions have also been observed in the past four weeks in Eastern Cape, Limpopo, Mpumalanga and KwaZulu-Natal. In Free State and Northern Cape, sustained decreases in admissions have been observed for three weeks.
- The weekly numbers of admissions in the private sector in the third wave have surpassed the peak of admissions in the second wave in Free State and Northern Cape.

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## METHODS

DATCOV, a hospital surveillance system for COVID-19 admissions, was initiated on the 1 April 2020. A COVID-19 case was defined as a person with a positive reverse transcriptase polymerase chain reaction (RT-PCR) assay for SARS-CoV-2 or a person who had a positive SARS-CoV-2 antigen test who was admitted to hospital. Case fatality ratio (CFR) was calculated for all closed cases, i.e. COVID-19 deaths divided by COVID-19 deaths plus COVID-19 discharges, excluding individuals who are still admitted in hospital. For the calculation of cumulative incidence risks, StatsSA mid-year population estimates for 2020 were utilised.

We used last 7-day average incidence per 1 million capita as reported in Our World in Data; for the purposes of this analysis, using the 7-day running average (either absolute or per capita) would be equivalent. For comparisons of the last period and previous period, we used 14-day average admissions for both periods.

Data are submitted by public and private hospitals that have agreed to report COVID-19 admissions through DATCOV surveillance in all nine provinces of South Africa. On 15 July 2020, the National Health Council decided that all hospitals should report to DATCOV. As of 19 June 2021, a total of 656 facilities submitted data on hospitalised COVID-19 cases, 399 from public sector and 257 from private sector (Table 1). This reflects 100% coverage of all public and private hospitals that have had COVID-19 admissions. As new hospitals join the surveillance system, they have retrospectively captured all admissions recorded although there may be some backlogs in retrospective data capture.

**Table 1.** Number of hospitals reporting data on COVID-19 admissions by province and sector, South Africa, 5 March 2020-19 June 2021

Name of province	Public Sector	Private Sector
Eastern Cape	85	18
Free State	35	20

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## RESULTS

### Epidemiological and geographic trends in admissions

From 5 March 2020 to 19 June 2021, a total of 291,476 COVID-19 admissions were reported from 656 facilities in all nine provinces of South Africa. South Africa has entered the third wave. Since week 14 2021, numbers of COVID-19 admissions have increased particularly in the private sector (Figure 1). Decreases in the most recent week may reflect delays in data submission.

**Figure 1.** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, South Africa, 5 March 2020-19 June 2021, n=291,476

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

The majority of admissions were recorded in four provinces, Gauteng 81,904 (28%), Western Cape 62,037 (21%), Eastern Cape 32,331 (11%) and KwaZulu-Natal 50,379 (17%) provinces. Numbers of COVID-19 admissions have increased in all provinces (Figures 2a and 2b). Reductions in the most recent week may be as a result of delayed reporting.

**Figure 2a.** Number of reported COVID-19 admissions, by provinces with highest admissions and epidemiologic week of diagnosis, South Africa, 5 March 2020-19 June 2021, n=291,476

**Figure 2b.** Number of reported COVID-19 admissions, by provinces with lowest admissions and epidemiologic week of diagnosis, South Africa, 5 March 2020-19 June 2021, n=291,476

WEEK 24 2021

## EPIDEMIOLOGICAL AND GEOGRAPHIC TRENDS IN IN-HOSPITAL MORTALITY

The number of deaths has increased in both sectors in the third wave (Figure 3).

**Figure 3.** Number of in-hospital COVID-19 in-hospital deaths reported per week by health sector and epidemiologic week, South Africa, 5 March 2020-19 June 2021, n=58,804

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Most deaths were reported in Gauteng 14,993 (25%), KwaZulu-Natal 11,120 (19%), Western Cape 10,342 (18%) and Eastern Cape 9,535 (16%). The numbers of COVID-19 deaths have increased in Gauteng, Northern Cape, North West and Free State, with small increases also noted in other provinces (Figures 4a and 4b).

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## PROVINCIAL TRENDS

There was an increase in the average COVID-19 admissions comparing the previous 14 days and the current 14 days in Eastern Cape, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga and Western Cape (Table 3). Decreases in the most recent week may in part reflect delays in data submission. There were 19 of 52 (37%) districts across the country that reported increased admissions over the previous 14 days, Buffalo City, Nelson Mandela Metro, O R Tambo and Sarah Baartman (Eastern Cape), City of Tshwane Metro, Ekurhuleni Metro and West Rand (Gauteng), iLembe, King Cetshwayo, Ugu, uMkhanyakude and Zululand (KwaZulu-Natal), Capricorn, Mopani and Vhembe (Limpopo), Nkangala (Mpumalanga), Bojanala Platinum (North West), Namakwa (Northern Cape) and Garden Route (Western Cape) (Appendix 1).

**Table 3.** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, South Africa, 22 May-19 June 2021

Province	Hospital admissions		Percentage change in admissions	Hospital deaths		Percentage change in deaths

\* Reporting of new admissions in the most recent week may be delayed

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## EASTERN CAPE

In both waves there were higher numbers of admissions in the public sector. Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in both sectors. There has been increase in admissions in the private sector since week 19 and in the public sector since week 21 (Figure 5).

**Figure 5:** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, Eastern Cape, 5 March 2020-19 June 2021, n=32,331

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

The weekly admissions at the peak of the second wave exceeded the numbers of admissions at the peak of the first wave in all districts (Figure 6). There have been small increases in admissions in a few districts over the past five weeks, with highest increase in Nelson Mandela Metro.

**Figure 6.** Number of reported COVID-19 admissions, by district and epidemiologic week, Eastern Cape, 5 March 2020-19 June 2021, n=32,331

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

The weekly deaths at the peak of the second wave exceeded the numbers of deaths at the peak of the first wave in all districts (Figure 7). There have been small increases in deaths in Nelson Mandela Metro and Sarah Baartman districts.

**Figure 7.** Number of reported COVID-19 in-hospital deaths, by district and epidemiologic week, Eastern Cape, 5 March 2020-19 June 2021, n=9,535

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

There was an increase in the average COVID-19 admissions comparing the previous 14 days and the current 14 days in Buffalo City Metro, Joe Gqabi, Nelson Mandela Bay, O R Tambo and Sarah Baartman (Table 4). The highest percentage change in admissions was in Sarah Baartman.

**Table 4:** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, Eastern Cape, 22 May-19 June 2021

District	Previous 14 days admissions average	Current 14 days admissions average	Percentage change in admissions	Previous 14 days deaths average	Current 14 days deaths average	Percentage change in deaths
Alfred Nzo	0.43	0.43	0.00	0.00	0.14	0.00
Amathole	0.00	0.43	0.00	0.00	0.14	0.00

Sarah Baartman	1.21	3.14	158.82	0.14	0.50	250.00

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## FREE STATE

In the first wave there were roughly equal numbers of admissions in both sectors, but in the second wave there were higher numbers of admissions in the public sector (Figure 8). Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in the public sector. The numbers of COVID-19 admissions increased in both sectors since week 9 and have shown sustained decreases for the past 3 weeks. The weekly numbers of admissions in the private sector in the third wave have surpassed the peak of the second wave.

**Figure 8:** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, Free State, 5 March 2020-19 June 2021, n=18,717

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in Fezile Dabi, Thabo Mofutsanyane and Xhariep (Figure 9). Admissions have increased in all districts, with highest increase in Mangaung Metro. The weekly number of admissions have surpassed the peak of the second wave in Mangaung Metro.

**Figure 9:** Number of reported COVID-19 admissions, by district and epidemiologic week, Free State, 5 March 2020-19 June 2021, n=18,717

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly deaths at the peak of the second wave exceeded the weekly numbers of deaths at the peak of the first wave in Thabo Mofutsanyana, Fezile Dabi and Xhariep (Figure 10). The numbers of COVID-19 deaths have increased in four districts, Mangaung Metro, Thabo Mofutsanyane, Lejweleputswa and Fezile Dabi. The weekly number of deaths have surpassed the peak of the second wave in Lejweleputswa.

**Figure 10:** Number of reported COVID-19 in-hospital deaths, by district and epidemiologic week, Free State, 5 March 2020-19 June 2021, n=3,740

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

There was decreases in COVID-19 admission between previous 14 days average admissions and current 14 days average admissions in all the districts. (Table 5).

**Table 5:** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, Free State, 22 May-19 June 2021

District	Previous 14 days admissions average	Current 14 days admissions average	Percentage change in admissions	Previous 14 days deaths average	Current 14 days deaths average	Percentage change in deaths
Fezile Dabi	8.36	5.07	-39.32	0.64	0.50	-22.22

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## NORTH WEST

In both waves there were higher numbers of admissions in the public sector. Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in both sectors (Figure 23). The numbers of COVID-19 admissions have increased in both sectors since week 10.

**Figure 23:** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, North West, 5 March 2020-19 June 2021, n=18,128

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in all districts except Dr Kenneth Kaunda (Figure 24). The numbers of COVID-19 admissions have increased in Dr Kenneth Kaunda district since week 9 and in Bojanala Platinum since week 14.

**Figure 24:** Number of reported COVID-19 admissions, by district and epidemiologic week, North West, 5 March 2020-19 June 2021, n=18,128

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly deaths at the peak of the second wave exceeded the weekly numbers of deaths at the peak of the first wave in all districts (Figure 25). The numbers of COVID-19 deaths have increased in all districts, particularly Dr Kenneth Kaunda district.

**Figure 25:** Number of reported COVID-19 in-hospital deaths, by district and epidemiologic week, North West, 5 March 2020-19 June 2021, n = 2,365

There has been an increase in COVID-19 admission between previous 14 days average admissions and current 14 days average admissions in Bojanala Platinum. The highest percentage change in admissions was in Bojanala Platinum (Table 10).

**Table 10:** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, North West, 22 May-19 June 2021

District	Previous 14 days admissions average	Current 14 days admissions average	Percentage change in admissions	Previous 14 days deaths average	Current 14 days deaths average	Percentage change in deaths
Bojanala Platinum	18.07	26.36	45.85	1.57	3.21	104.55
Dr Kenneth Kaunda	41.14	36.71	-10.76	6.64	6.00	-9.68
Dr Ruth Segomotsi Mompati	8.21	4.57	-44.35	1.57	1.07	-31.82
Ngaka Modiri Molema	3.71	2.43	-34.62	1.36	1.21	-10.53

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## NORTHERN CAPE

In both waves there were roughly equal numbers of admissions in both sectors. Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in both sectors (Figure 26). The numbers of COVID-19 admissions have increased in both sectors since week 9 and have decreased in the past 3 weeks. The weekly numbers of admissions in the private sector in the third wave have surpassed the numbers during the peak of the second wave.

**Figure 26:** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, Northern Cape, 5 March 2020-19 June 2021, n=6,116

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly admissions at the peak of the second wave exceeded the weekly number of admissions during the peak of the first wave in Pixley ka Seme, Namakwa and ZF Mgcawu districts (Figure 27). The weekly number of admissions in the third wave has surpassed the peak of the second wave in Frances Baard, ZF Mgcawu and John Taolo Gaetsewe districts.

**Figure 27:** Number of reported COVID-19 admissions, by district and epidemiologic week, Northern Cape, 5 March 2020-19 June 2021, n=6,116

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly deaths at the peak of the second wave exceeded the weekly numbers of deaths at the peak of the first wave in Pixley ka Seme, Namakwa and ZF Mgcawu districts (Figure 28). The weekly number of COVID-19 deaths in the third wave has surpassed the peak of second wave in Frances Baard and ZF Mgcawu district.

**Figure 28:** Number of reported COVID-19 in-hospital deaths, by district and epidemiologic week, Northern Cape, 5 March 2020-19 June 2021, n=1,152

There has been an increase in COVID-19 admission between previous 14 days average admissions and current 14 days average admissions in Namakwa. The highest percentage change in new admissions was in Namakwa district (Table 11).

**Table 11:** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, Northern Cape, 22 May-19 June 2021

District	Previous 14 days admissions average	Current 14 days admissions average	Percentage change in admissions	Previous 14 days deaths average	Current 14 days deaths average	Percentage change in deaths
Frances Baard	13.43	9.21	-31.38	2.64	3.14	18.92
John Taolo Gaetsewe	3.64	3.57	-1.96	0.43	0.71	66.67
Namakwa	2.00	2.29	14.29	0.50	0.43	-14.29
Pixley Ka Seme	1.50	0.93	-38.10	0.50	0.50	0.00
ZF Mgcawu	6.79	5.50	-18.95	2.00	2.00	0.00

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## WESTERN CAPE

In both waves there were higher numbers of admissions in the public sector. Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in both sectors (Figure 29). There has been increase in admissions in both sectors since week 17.

**Figure 29:** Number of reported COVID-19 admissions by health sector and epidemiologic week of diagnosis, Western Cape, 5 March 2020-19 June 2021, n=62,037

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly admissions at the peak of the second wave exceeded the weekly numbers of admissions at the peak of the first wave in all districts (Figure 30). There have been increases in admissions in all districts, particularly City of Cape Town.

**Figure 30:** Number of reported COVID-19 admissions, by district and epidemiologic week, Western Cape, 5 March 2020-19 June 2021, n=62,037

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

Weekly deaths at the peak of the second wave exceeded the weekly numbers of deaths at the peak of the first wave in all districts (Figure 31). There have been small increases in deaths particularly in City of Cape Town Metro.

**Figure 31:** Number of reported COVID-19 in-hospital deaths, by district and epidemiologic week, Western Cape, 5 March 2020-19 June 2021, n=10,342

All districts showed small increases in COVID-19 admissions between the previous 14 days average admissions and the current 14 days average admissions except West Coast. The highest percentage change in admissions was in Overberg (Table 12).

**Table 12:** Previous 14 days and current 14 days average COVID-19 admissions and deaths and percentage changes, Western Cape, 22 May-19 June 2021

District	Previous 14 days admissions average	Current 14 days admissions average	Percentage change in admissions	Previous 14 days deaths average	Current 14 days deaths average	Percentage change in deaths
Cape Winelands	6.93	12.50	80.41	1.00	1.57	57.14
Central Karoo	0.57	0.79	37.50	0.21	0.00	-100.00
City of Cape Town Metro	42.43	62.79	47.98	3.64	8.29	127.45
Garden Route	8.57	13.21	54.17	0.71	1.29	80.00

West Coast	4.71	3.86	-18.18	1.07	0.93	-13.33

# COVID-19 HOSPITAL SURVEILLANCE UPDATE

WEEK 24 2021

## LIMITATIONS

DATCOV now includes reporting from all hospitals with COVID-19 admissions but many hospitals are yet to reach complete submission of historic data. Data quality in a surveillance system is dependent on the information submitted by healthcare institutions. It is not possible for the NICD to verify or check the quality of all these data, however, the NICD has built-in data quality checks. Delays in reporting of admissions and deaths may affect the numbers reported in the most recent week. The National Department of Health have recruited data capturers to support hospitals to improve data submission.

As hospitals reached capacity, admission criteria may change and therefore influence trends and inferences about the progression of the epidemic. DATCOV only reports hospital-based admissions and deaths and therefore does not include deaths occurring outside hospitals. DATCOV now has a module to record out-of-hospital deaths.

WEEK 24 2021

## ACKNOWLEDGEMENTS

All public and private sector hospitals submitting data to DATCOV

Private hospital groups submitting data to DATCOV:

- Netcare
- Life Healthcare
- Mediclinic Southern Africa
- National Hospital Network (NHN)
- Clinix Health Group
- Lenmed
- Joint Medical Holdings (JMH)
