

WHAT IS A NOTIFIABLE MEDICAL CONDITION (NMC)?

Notifiable Medical Conditions are diseases that are of public health importance because they pose significant public health risks that can result in disease outbreaks or epidemics with high case fatality rates both nationally and internationally.

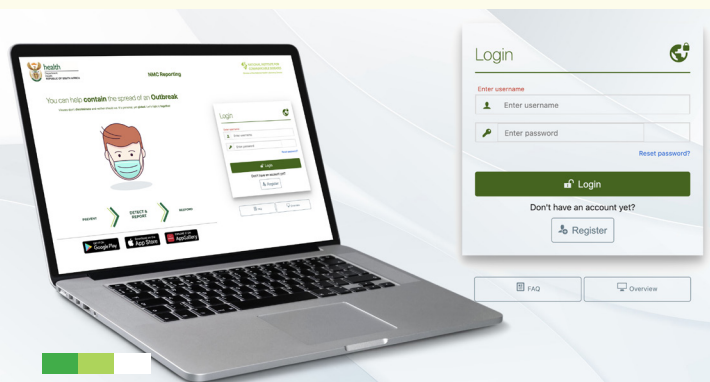

WHY IS IT A LEGAL REQUIREMENT TO TIMEOUSLY REPORT ALL NMC?

The only way we can control the spread of infectious diseases within the population is through identification of diseased persons and implementation of necessary public health actions to ensure that the disease is not spread to other people. Real-time efficient surveillance and reporting of such diseases provides an early warning signal and provides a window of opportunity to interrupt the disease transmission cycle. The International Health Regulations, 2005 (IHR) and the National Health Act, 61 of 2003 in South Africa require the rapid detection of NMC, as well as the prompt risk assessment, notification, verification and implementation of timely interventions.

WHO IS RESPONSIBLE FOR REPORTING NMC?

*Every doctor or nurse (health care provider), laboratory, and medical scheme in both the public and private health sectors who diagnoses a patient with any one of the NMC must report the case. **Failure to report an NMC is a criminal offence.***

IN SOUTH AFRICA, WHICH CONDITIONS ARE NOTIFIABLE?

CATEGORY 1 NMC

Must be reported immediately using the most rapid means upon clinical or laboratory diagnosis, followed by a written or electronic notification within 24 hours of diagnosis. Clinicians are urged to complete the hospital form for hospitalised patients with category 1 conditions.

Acute flaccid paralysis
Acute rheumatic fever
Anthrax
Botulism
Cholera
Congenital rubella syndrome
COVID-19
Diphtheria
Enteric fever (typhoid or paratyphoid fever)
Foodborne disease outbreak
Haemolytic uraemic syndrome (HUS)
Listeriosis
Malaria
Measles
Meningococcal disease
Mpox
Pertussis
Plague
Poliomyelitis
Rabies (human)
Respiratory disease caused by a novel respiratory pathogen
Rubella
Rift valley fever (human)
Smallpox
Viral haemorrhagic fever diseases
Waterborne illness outbreak
Yellow fever

CATEGORY 2 NMC

Must be reported through a written or electronic notification within 7 days of clinical or laboratory diagnosis, but preferably as soon as possible following diagnosis.

Agricultural or stock remedy poisoning
Bilharzia (schistosomiasis)
Brucellosis
Congenital syphilis
Haemophilus influenzae type B
Hepatitis A
Hepatitis B
Hepatitis C
Hepatitis E
Lead poisoning
Legionellosis
Leprosy
Maternal death (pregnancy, childbirth, puerperium)
Mercury poisoning
Soil transmitted helminths (*Ascaris Lumbricoides*, *Trichuris trichiuria*, *Ancylostoma duodenale*, *Necator americanus*)
Tetanus
Tuberculosis: pulmonary
Tuberculosis: extra-pulmonary
Tuberculosis: multidrug-resistant (MDR-TB)
Tuberculosis: extensively drug-resistant (XDR-TB)

HOW DO I NOTIFY CATEGORY 1 & 2?

In addition to the process below, category 1 NMC must be reported to the local health authority immediately using the most rapid means.

Health facility-based reporting (all hospitals, clinics, private practices)

Electronic notification via the NMC APP <https://nmc.nicd.ac.za> (Download the NMC APP from the NICD website (NMC page) or via your cell phone's app store. Refer to the NMC APP user manuals)

1. Capture the NMC case details onto the NMC mobile or web APP (New Case tab).

2. Upon completion of the data capture, save the data. The notification will automatically be sent to all relevant focal people at the Health Establishment, Sub-district, District, Province, and National.

Paper-based notification (also refer to SOP for NMC reporting)

1. Complete the NMC Case Notification Form.
2. Send the NMC Case Notification Form to NMCsurveillanceReport@nicd.ac.za or fax to 086 639 1638 or NMC hotline 072 621 3805. Form(s) can be sent via sms, whatsapp, email, fax.
3. Send a copy to the NMC focal person at Sub-District/ District (details given on the cover page of the NMC booklet).

Laboratory based reporting (ALL laboratories)

If your laboratory is not on the electronic reporting system, follow the manual steps below:

CATEGORY 3 NMC

Ceftriaxone-resistant <i>Neisseria gonorrhoea</i>
West Nile virus, Sindbis virus, Chikungunya virus
Dengue fever virus, other imported arboviruses of medical importance
salmonella
Shiga toxin-producing <i>Escherichia coli</i>
<i>Shigella</i> spp.

CATEGORY 4 NMC

Must be reported monthly by private and public health laboratories. Healthcare-associated infections or multidrug-resistant organisms of public health importance.

Carbapenemase-producing Enterobacteriaceae
Vancomycin-resistant enterococci
<i>Staphylococcus aureus</i> : hGISA and GISA
Colistin-resistant <i>Pseudomonas aeruginosa</i>
Colistin-resistant <i>Acinetobacter baumannii</i>
<i>Clostridium difficile</i>

HOW DO I NOTIFY CATEGORY 3 & 4?

Reporting by laboratories only.

Category 3 and 4 conditions will be reported automatically from laboratories through an Application Programming Interface (API). For more information on setting up your laboratory with an API, use the contact details below to reach out.
